

CONTINUOUS ENGAGEMENT LTD

LEAN

LEAN follows 5 principles: Value, Value Stream, Flow, Pull & Perfect(ion)

LEAN is often focussed on Efficiency - how much effort it takes to complete a task, product, project etc.

And how much of that effort is useful (Value) versus how much is unnecessary (Waste)

Value Stream

Perfect

Value

Pull

Flow

Various tools, such as: Value Stream Mapping, The 8 Wastes, Visual Management etc help to identify and eliminate Waste

CONTINUOUS ENGAGEMENT LTD

6 SIGMA

6 SIGMA is a framework for reducing the amount of variation in a process

6 SIGMA can be focussed on how Accurate and Predictable a task, product or process is, and could be.

D

M

A

I

C

The framework DMAIC (Define, Measure, Analyse, Improve, Control) gives a structure to understanding the causes of variation. Tools such as: Run Charts, Capability Charts and Statistical Process Control are used
